CIRCULAR

This is hereby to inform all the II, III, IV B.Tech and I, II M.Tech students that the CIVIL department is organizing a ten days certification course on "STAAD.PRO" by Mr. K. Kiran Kumar Associate professor of CIVIL From 24-11-2018 to 05-12-2018. So all the students are here by informed to give the names on or before 22-11-2018 and utilize this opportunity by attending the classes.

Venue: Computer lab

Guntur

Andhra Pradesh-522017, INDIA

About the Institute

Established in 2008, Priyadarshini Institute of Technology and Management (PITM, Guntur) is a premier Institute located in Andhra Pradesh. Institute offers Degree and Diploma courses including 7 UG and 5 PG courses. These programs are offered in Full Time mode. Priyadarshini Institute of Technology and Management (PITM, Guntur) is a premier institute for B.Tech, M.Tech, MBA courses. Candidate can pursue in multiple range of courses like B.Tech, M.Tech, MBA with the stream of Engineering, Business & Management Studies.

The Mission of Priyadarshini is to develop high quality technical education and personnel with a sound footing on basic engineering principles, technical and managerial skills, innovative research capabilities, and exemplary professional conduct to lead and to use technology for the progress of mankind, adapting themselves to changing technological environment with the highest ethical values.

About the Department

CIVIL:

Civil engineering is professional engineering discipline that deals with the design, construction, and maintenance of the physical and naturally built environment, including public works such as roads, bridges, canals, dams, airports, sewerage systems, pipelines, structural components of buildings, and railways. It is rightly considered the most versatile amongst all engineering branches. It is the branch with a lot of diversity right from surveying, geo-technology to structural engineering, environmental sciences to hydraulics, and transportation to hydrology. Civil engineering can be considered as the single largest core engineering branch.

About the Programme

STAAD Pro full form stands for Structural Analysis and Designing Program. STAAD Pro is a structural analysis & design computer program that was being developed by Research Engineers International (REI) at Yorba Linda, California in 1997. Today, STAAD Pro is one of the popular and widely used software for structural analysis and design across the globe by Civil engineers. It supports all types of various steel, concrete, and timber design codes. Using STAAD Pro, civil engineers can design any type of structure, and later share the synchronized model data amongst the entire design team. Total 110 students were participated in this training program.

Objectives of the Programme

- Model Verification: 2D/3D drawings on-screen and printer/plotter full 3D shapes for frames, elements Isometric, or any rotations for full 3D viewing.
- Static Analysis: 2D/3D analysis on the basis of state-of-the-art Matrix method to handle extremely large work. Linear, non-linear, p-delta analysis with automatic load & stiffness correction.
- Dynamic/Seismic Analysis: Mass modeling, frequency, and mode shape Response spectrum extraction, analysis of time history Modal damping ratio for individual models.

Topics to be covered
PRINCIPAL

PRIYADARSHINI INSTITUTE OF
TECHNOLOGY & MANAGEMENT
Introduction to Structural Engineering
KORNEPADU (VII), Vatticherukuru (M),
Guntur-522017

- Model generation using STAAD editor
- Model generation using Node/Beam Editor
- Introduction to Translational Repeat
- Model generation using Translational Repeat
- Assigning Supports
- Assigning Loads
- Structure Analysis
- Basics
- Analysis of Framed Structure
- Applying Floor Loads

PROGRAM REPORT

Name of the Event	: A Ten Days Certification Course on “STAAD.PRO”
Date	: 24-11-2018 to 05-12-2018.
Resource Person	: Mr. K. KIRAN KUMAR Associate Professor, Department of civil engineering Contact number: 9848552591 Email ID:kondrukiran123@gmail.com
Name of The Coordinator	: Mr. Sk. Subhani Assistant Professor, Department of civil engineering
Number of Student Attended	: 110
Venue	: Computer lab, Priyadarshini institute of technology and management.

Priyadarshini institute of technology and Management, Pullatigunta. Organized certificate program on STAAD.Pro for B.Tech students by the resource person **Mr. K. KIRAN KUMAR.** STAAD Pro full form stands for Structural Analysis and Designing Program. STAAD Pro is a structural analysis & design computer program that was being developed by Research Engineers International (REL) at Yorba Linda, California in 1997. Today, STAAD Pro is one of the popular and widely used software for structural analysis and design across the globe by Civil engineers. It supports all types of various steel, concrete, and timber design codes. Using STAAD Pro, civil engineers can design any type of structure, and later share the synchronized model data amongst the entire design team. Total 110 students were participated in this training program.

OBJECTIVES OF THE PROGRAM

The objectives of the program are

- **Model Generation:** Generation of an interactive menu-driven model with concurrent 3D display 2D & 3D graphics generation using rectangular or polar coordinate systems
Segments of repetitive geometry used to generate complex structural models.
- **Model Verification:** 2D/3D drawings on-screen and printer/plotter full 3D shapes for frames, elements Isometric, or any rotations for full 3D viewing.

- Static Analysis: 2D/3D analysis on the basis of state-of-the-art Matrix method to handle extremely large work. Linear, non-linear, p-delta analysis with automatic load & stiffness correction.
- Dynamic/Seismic Analysis: Mass modeling, frequency, and mode shape Response spectrum extraction, analysis of time history Modal damping ratio for individual models.
- Secondary Analysis: Finite element capabilities, concrete design, steel design, and timber design. Forces & displacements at sections between nodes. Maximum & minimum force envelopes.

OUTCOME OF THE PROGRAM

Outcome of the program are

- Students will be able to complete object-oriented instinctive 2D/3D graphic model generation.
- Students will be able for carrying out flexible zooms and multiple views.
- Students will know to make isometric & perspective views and 3D shapes.
- Students will know the use of simple command language and a built-in command file editor.
- Students will learn how to generate graphics/text input.
- Students will learn how to achieve user-specified design parameters to customize a design.
- Students will know to perform code checks, member selection, and optimized member selection consisting of analysis/design cycles.
- Students will be able to design concrete beams/columns/slabs/footings as per all major

CIRCULAR

All the students of Department of ELECTRICAL & ELECTRONICS ENGINEERING are hereby informed, that a Ten days certification course on "EARTHING AND GROUNDING PRACTICES" by Smt K. JYOTHI Asst .prof of EEE from 04-03-2019 to 14-03-2019 in seminar hall under the department of EEE so all the III, IV B. Tech EEE and I, II MTECH EEE students are requested to attend, gain knowledge and make the program success. For registration please contact EEE Department office between 10AM to 4PM.on or before 01-03-2019.

Venue : SEMINOR HALL

Guntur

Andhra Pradesh-522017, INDIA

About the Institute

Established in 2008, Priyadarshini Institute of Technology and Management (PITM, Guntur) is a premier Institute located in Andhra Pradesh. Institute offers Degree and Diploma courses including 7 UG and 5 PG courses. These programs are offered in Full Time mode. Priyadarshini Institute of Technology and Management (PITM, Guntur) is a premier institute for B.Tech, M.Tech, MBA courses. Candidate can pursue in multiple range of courses like B.Tech, M.Tech, MBA with the stream of Engineering, Business & Management Studies.

The Mission of Priyadarshini is to develop high quality technical education and personnel with a sound footing on basic engineering principles, technical and managerial skills, innovative research capabilities, and exemplary professional conduct to lead and to use technology for the progress of mankind, adapting themselves to changing technological environment with the highest ethical values.

About the Department

EEE:

Department of Electrical and Electronic Engineering (EEE) – a hub of innovation and excellence in the realm of technology. Our department stands at the forefront of cutting-edge advancements, offering a dynamic learning environment where students are empowered to explore, create, and shape the future. With a dedicated faculty of experts, state-of-the-art laboratories, and a commitment to fostering both theoretical understanding and practical skills, we prepare our students to tackle real-world challenges and lead in industries spanning from electronics and power systems to communications and beyond. Join us in the journey of discovery and innovation in the fascinating world of Electrical and Electronic Engineering.

About the Programme

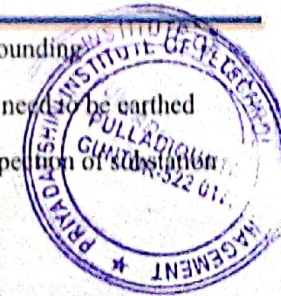

- Understand need of earthing or grounding
- What is it mean by earthing, what need to be earthed
- Identify earthing during visual inspection of substation
- Advantage of earthing
- Maintenance earthing
- Earthing for human and equipment safety, mechanical forces during sub-transient
- Characteristics of good earthing
- Difference between earthing and bonding
- What is Bonding and why it is different from Earthing
- Soil Characteristics, Sphere of influence, Earth Rod, Resistivity

Objectives of the Programme

- To make student to acquire the knowledge on Earthing is a simple way for the leakage of current and hence protects the devices from electrical damage.
- Grounding is also a safety process that protects the entire power system from malfunctioning and is mainly used to balance the load when the electric system overloads.
- Provide an alternative path for the fault current to flow so that it will not endanger the user.
- Ensure that all exposed conductive parts do not reach a dangerous potential.

Topics to be covered

- Electrical substation grounding
- Types of earthing
- Lay out and bus arrangement
- Voltage levels
- Substation equipments protection and control
- Substation earthing tolerance limits of body currents
- Tolerable and actual step and touch voltages
- Design of earthing grid, tower footing resistance
- Measurement of soil and earth resistivity
- Power system earthing
- Ground versus isolated neutral
- Resistance and impedance grounding
- Resonant grounding and reactance grounding
- Grounding practice

PROGRAM REPORT

Name of the event: A Ten days certification course On “EARTHING AND GROUNDING PRACTICES” By Priyadarshini Institute of Technology and Management, Pulladigunta

Date of Event: 04-03-2019 to 14-03-2019.

Resource person: Smt K . JYOTHI, Asst . prof . Dept of EEE

CONTACT NO: 9491389609

EMAIL: jyothi.kommu@gmail.com

Name of the coordinator: Mr. MD. SYED ASLAM

Organized by: DEPARTMENT OF ELECTRICAL & ELECTRONICS ENGINEERING

Number of students attended: 64

Venue: seminar hall, Priyadarshini institute of technology and management

Priyadarshini institute of technology and management, Pulladigunta. Organized a two-week certification course on “EARTHING AND GROUNDING PRACTICES” for B. tech and M. tech students by the resource person Smt K . JYOTHI. To make student to acquire the knowledge on Earthing is a simple way for the leakage of current and hence protects the devices from electrical damage. Grounding is also a safety process that protects the entire power system from malfunctioning and is mainly used to balance the load when the electric system overloads.

Objectives:

- Provide an alternative path for the fault current to flow so that it will not endanger the user.
- Ensure that all exposed conductive parts do not reach a dangerous potential.

Learning Outcomes:

- Understand need of earthing or grounding
- What is it mean by earthing, what need to be earthed
- Identify earthing during visual inspection of substation
- Advantage of earthing
- Maintenance earthing
- Characteristics of good earthing
- Difference between earthing and bonding
- What is Bonding and why it is different from Earthing
- Soil Characteristics, Sphere of influence, Earth Rod, Resistivity
- Earthing design concept
- Base design of earthing, material use for earthing
- How make joints in earthing, exothermic welding
- Voltage Gradient and Ground Potential Rise
- Ground Potential Rise
- Step and touch Voltage
- Transfer Potential , Soil Resistivity
- How to Measure Soil Resistivity
- Step and Potential limits
- Surface Layer Material and why gravel is used
- Maximum Grid Current

CIRCULAR

This is hereby to inform all the II, III&IV B.Tech students that the MECH department is organizing a Two-weeks certification course on "RENEWABLE ENERGY" by Mr. K.LALITHA BABU Associate professor of MECH From 14-08-2018 and 24-08-2018. So all the students are here by informed to give the names on or before 12-08-2018 and utilize this opportunity by attending the classes.

Venue: Seminar Hall

Timing: 10:00 AM TO 4:00 PM

Guntur

Andhra Pradesh-522017, INDIA

About the Institute

Established in 2008, Priyadarshini Institute of Technology and Management (PITM, Guntur) is a premier Institute located in Andhra Pradesh. Institute offers Degree and Diploma courses including 7 UG and 5 PG courses. These programs are offered in Full Time mode. Priyadarshini Institute of Technology and Management (PITM, Guntur) is a premier institute for B.Tech, M.Tech, MBA courses. Candidate can pursue in multiple range of courses like B.Tech, M.Tech, MBA with the stream of Engineering, Business & Management Studies. The Mission of Priyadarshini is to develop high quality technical education and personnel with a sound footing on basic engineering principles, technical and managerial skills, innovative research capabilities, and exemplary professional conduct to lead and to use technology for the progress of mankind, adapting themselves to changing technological environment with the highest ethical values.

About the Department

ME:

We train the next generation of 'whole-brain' mechanical engineers to lead with both creativity and analytical thinking. We pursue fundamental principles at the core of mechanical sciences and their interface with other scientific disciplines, and we generate new products, processes, and systems that create lasting societal impact.

To be truly innovative, mechanical engineers of the future need to understand the basics of mechanics, manufacturing, and systems while integrating aspects of other disciplines. With its collaborations across departments and institutions, the Department of Mechanical Engineering educates the engineers of the future while conducting leading-edge research in Advanced Manufacturing, AI and Design, Bio and Health, Computational Engineering, Energy and Sustainability, Micro-nano engineering, and Robotics and Automation.

GUNTUR - 522 017.

About the Programme

- The course will give knowledge about to Renewable energy
- The course will use to gain knowledge to utilization and future scope about renewable energy sources

Objectives of the Programme

- The objective of the courses is to develop in-depth knowledge for the following: Various renewable energy resources available at a location and assessments of its potential, using tools and techniques
- Secure energy security by reducing dependency of fossil fuels which will address the challenges of climate change and also to help in reducing the carbon footprint.
- Adopting / evolving RE technologies and facilitating commercial development of the same e.g. wind, solar, tidal, geothermal etc.

Topics to be covered

- Need of Non-Conventional Energy Sources
- Renewable Sources Of Energy Such As Hydro, Solar, Wind, Biomass, Tidal and Geothermal - Their Availability and Limitations
- Biomass Energy Bio-Gas as a Source of Energy. Benefits of Bio-Gas. Technology of Biogas selection Of Biogas Model and Size.
- Site Selection of Biogas Plants. Appliances of Biogas Plants Solar Power Plant
- Solar Constants, Measurement of Solar Radiations Solar Energy Conversion CSP Generators, Construction and Working Principle Construction of A Solar PV Systems Wind Power Plant
- Captive Power Plant and Other Renewable Energy Sources

DEPARTMENT OF MECHANICAL ENGINEERING

Name of the Program: Renewable energy

Report on certificate program on “RENEWABLE ENERGY PROGRAMING”

PROGRAM REPORT

Name Of The Event : A two weeks certificate program on” RENEWABLE ENERGY”

Date : 14-08-2018 to 24-08-2018.

Resource Person : Mr. K.LALITHA BABU

Designation: Associate professor

Department: MECHANICAL ENGINEERING

Address: PITM, TENALI

Email ID: lalithababu.k@gmail.com

Contact number: 9133141408

Name of The Coordinator : Mr. KOLLURU VARA PRASAD associate professor,
Department of Mechanical engineering

Number of Student Attended : 89

VENUE : Seminar Hall, Priyadarshini institute of technology and
Management.

Priyadarshini institute of technology and Management, Pullatigunta. Organized certificate program on RENEWABLE ENERGY for B.Tech students by the resource person **Mr. K.LALITHA BABU**. **RENEWABLE ENERGY** is energy derived from natural sources that are replenished at a higher rate than they are consumed. Sunlight and wind, Fossil fuels - coal, oil and gas - on the other hand, are non-renewable resources that take hundreds of millions of years to form. Fossil fuels, when burned to produce energy, cause harmful greenhouse gas emissions, such as carbon dioxide.

Renewable energy is often used for electricity generation, heating and cooling. Renewable energy projects are typically large-scale, but they are also suited to rural and remote areas and developing countries, where energy is often crucial in human development. Total 89 students were participated in this training program.

As of 2019, however, according to the International Renewable Energy Agency, renewable overall share in the energy mix (including power, heat and transport) needs to grow six times faster, in order to keep

faster, in order to keep the rise in average global temperatures "well below" 2.0 °C (3.6 °F) during the present century, compared to pre-industrial levels.

OBJECTIVES OF THE PROGRAM

- Generating energy that produces no greenhouse gas emissions from fossil fuels and reduces some types of air pollution.
- Diversifying energy supply and reducing dependence on imported fuels.
- Creating economic development and jobs in manufacturing, installation, and more

OUTCOME OF THE PROGRAM

- You have a good understanding of renewable energy systems, its components and interactions between the components.
- This includes all renewable energy technologies, different storage technologies, distribution grid, and smart grid including sensors.
- Regulation and control, and both "stand alone" systems and large integrated distribution systems.
- You have a good understanding of national and international regulations and framework conditions for renewable energy systems. This also includes different price models and actions.
- You have profound knowledge in a special field such as solar energy, storage, smart grid.
- You have approximately specialized knowledge in a field of renewable energy systems achieved through the work on a master thesis.

Guntur

Andhra Pradesh-522017, INDIA

About the Institute

Established in 2008, Priyadarshini Institute of Technology and Management (PITM, Guntur) is a premier Institute located in Andhra Pradesh. Institute offers Degree and Diploma courses including 7 UG and 5 PG courses. These programs are offered in Full Time mode. Priyadarshini Institute of Technology and Management (PITM, Guntur) is a premier institute for B.Tech, M.Tech, MBA courses. Candidate can pursue in multiple range of courses like B.Tech, M.Tech, MBA with the stream of Engineering, Business & Management Studies. The Mission of Priyadarshini is to develop high quality technical education and personnel with a sound footing on basic engineering principles, technical and managerial skills, innovative research capabilities, and exemplary professional conduct to lead and to use technology for the progress of mankind, adapting themselves to changing technological environment with the highest ethical values.

About the Department

ECE:

The department of Electronic and Communication Engineering is offering the undergraduate course (B.TECH) in Electronic and Communication Engineering and one post graduate course (M.TECH) in VLSI Design. The B. Tech. program was started in 2007. ECE department has more than 20 qualified and experienced faculty.

The department organized several symposiums, guest lectures, and workshops. They were encouraged to attend international and national conferences and to present their research work. They usually publish their research work in reputed international and national journals. The department is also encouraging all faculty members and students to join professional bodies and participate in activities. And to engage modern education aids, laboratories, and competent faculty to ensure effective teaching and learning processes to meet the ever-growing and changing industrial and business environments. To continuously challenge the young minds with ideas to carry out innovative research through interaction with research organizations and industry.

About the Programme

At the end of this course the student can able to:

- Understand the basic concepts of an embedded system and able to know an embedded system design approach to perform a specific function.
- The hardware components required for an embedded system and the design approach of an embedded hardware.
- The various embedded firmware design approaches on embedded environment.

Objectives of the Programme

- Concepts of an embedded system.
- Design approach to perform a specific function.
- The various embedded firmware design approaches.
- How to integrate hardware and firmware of an embedded system.

Topics to be covered

- Embedded system Introduction
- The typical embedded system-core of the embedded system
- Embedded hardware design
- Wireless devices
- Embedded firmware design
- Interrupt servicing mechanism, Real time operating system
- threads processes, Hardware software co-design
- Embedded system development
- Emulators and Debugging, Target hardware debugging
- Digital camera hardware and software architecture

PROGRAM REPORT

Name of the Event: A 10-days certificate program on “EMBEDDED SYSTEM”.

Date: 11-02-2019 to 21-02-2019.

RESOURCE PERSON: Mr. Y. KONDAIAH, HOD ECE.

Contact number: 8096966396

Mail id : kyendiuri@yahoo.com

Name of the co-ordinator: Mr. B. Venkatesh, Associate Professor, Dept. of ECE

No of Students: 92

Venue: Seminar Hall, Priyadarshini institute of technology and management.

PRIYADHARSHINI INSTITUTE OF TECHNOLOGY AND MANAGEMENT, Guntur, Organized certificate program on “EMBEDDEDE SYSTEM” for B. Tech. and M. Tech. students by the resource person Y. KONDAIAH. An embedded system is a system in which the computer is included as an integral part of the system. Often, the computer is relatively invisible to the user, without obvious applications, files, or operating systems. Totally 92 students were participated in this training program and their completion of the program they were able to understand the following objectives and learning outcomes.

OBJECTIVES:

- Design approach to perform a specific function.
- The various embedded firmware design approaches.
- How to integrate hardware and firmware of an embedded system.

Learning Outcomes:

At the end of this course the student can able to:

- Understand the basic concepts of an embedded system and able to know an embedded
- System design approach to perform a specific function.
- The hardware components required for an embedded system and the design approach of an embedded hardware.
- The various embedded firmware design approaches on embedded environment.
- Understand how to integrate hardware and firmware of an embedded system using
- Real time operating system.

ABOUT THE INSTITUTE

Established in 2008, Priyadarshini Institute of Technology and Management (PITM, Guntur) is a premier Institute located in Andhra Pradesh. Institute offers Degree and Diploma courses including 7 UG and 5 PG courses. These programs are offered in Full Time mode. Priyadarshini Institute of Technology and Management (PITM, Guntur) is a premier institute for B.Tech, M.Tech, MBA courses. Candidate can pursue in multiple range of courses like B.Tech, M.Tech, MBA with the stream of Engineering, Business & Management Studies.

The Mission of Priyadarshini is to develop high quality technical education and personnel with a sound footing on basic engineering principles, technical and managerial skills, innovative research capabilities, and exemplary professional conduct to lead and to use technology for the progress of mankind, adapting themselves to changing technological environment with the highest ethical values.

ABOUT THE DEPARTMENT

CSE:

The Department of Computer Science and Engineering, established in 2008, is one of the most dynamic departments of Priyadarshini Institute Of Technology and management. I am really elated to tell that the department stands on the strength of experienced and well qualified faculty who are very dedicated to teaching and also involved in up-gradation of knowledge. Their research experience will help to cultivate the future of our students. With great demand in industry and great placement opportunities, the department stands tall and proud. Our students are not only academically sound and disciplined but they also organize various events. Welcome to the exciting world of Computer Science Engineering (CSE), a field that drives innovation, shapes the digital age, and empowers the technology-driven society we live in. CSE professionals are the architects of the digital realm, designing, developing, and optimizing the software and systems that power our world betterment of the society.

ABOUT THE PROGRAMME

Java programming language has an open-source framework for unit testing, and it is one of the frameworks used by java developers for creating and running automated tests every time new code is added to certain test cases in java language, and please make sure that the code is flawless and the same is to be done. The use of Selenium with Java for automation testing has made life easier for developers.

OBJECTIVES OF THE PROGRAMME

- To learn why Java is useful for the design of desktop and web applications.
- To learn how to implement object-oriented designs with Java.
- To identify Java language components and how they work together in applications.
- To design and program stand-alone Java applications.
- To learn how to design a graphical user interface (GUI) with Java Swing.
- To understand how to use Java APIs for program development.
- To learn how to extend Java classes with inheritance and dynamic binding.
- To learn how to use exception handling in Java applications.
- To understand how to design GUI components with the Java Swing API.

TOPICS TO BE COVERED

- Embedded system Introduction
- The typical embedded system-core of the embedded system
- Embedded hardware design
- Wireless devices
- Embedded firmware design
- Interrupt servicing mechanism, Real time operating system
- threads processes, Hardware software co-design
- Embedded system development
- Emulators and Debugging, Target hardware debugging

Objectives:

- To learn why Java is useful for the design of desktop and web applications.
- To learn how to implement object-oriented designs with Java.
- To identify Java language components and how they work together in applications.
- To design and program stand-alone Java applications.
- To learn how to design a graphical user interface (GUI) with Java Swing.
- To understand how to use Java APIs for program development.
- To learn how to extend Java classes with inheritance and dynamic binding.
- To learn how to use exception handling in Java applications.
- To understand how to design GUI components with the Java Swing API.
- To learn Java generics and how to use the Java Collections API.
- To understand how to design applications with threads in Java.
- To learn how to read and write files in Java.

Learning Outcomes:

- Able to solve real world problems using OOP techniques.
- Able to understand the use of abstract classes.
- Able to solve problems using java collection framework and I/o classes.
- Able to develop multithreaded applications with synchronization.
- Able to develop applets for web applications
- Able to design GUI based applications
- Validate input in a Java program.
- Identify and fix defects and common security issues in code.
- Document a Java program using Javadoc.
- Use a version control system to track source code in a project.

About the Institute

Established in 2008, Priyadarshini Institute of Technology and Management (PITM, Guntur) is a premier Institute located in Andhra Pradesh. Institute offers Degree and Diploma courses including 7 UG and 5 PG courses. These programs are offered in Full Time mode. Priyadarshini Institute of Technology and Management (PITM, Guntur) is a premier institute for B.Tech, M.Tech, MBA courses. Candidate can pursue in multiple range of courses like B.Tech, M.Tech, MBA with the stream of Engineering, Business & Management Studies.

The Mission of Priyadarshini is to develop high quality technical education and personnel with a sound footing on basic engineering principles, technical and managerial skills, innovative research capabilities, and exemplary professional conduct to lead and to use technology for the progress of mankind, adapting themselves to changing technological environment with the highest ethical values.

About the Department

CSE:

The Department of Computer Science and Engineering, established in 2008, is one of the most dynamic departments of Priyadarshini Institute Of Technology and management. I am really elated to tell that the department stands on the strength of experienced and well qualified faculty who are very dedicated to teaching and also involved in up-gradation of knowledge. Their research experience will help to cultivate the future of our students. With great demand in industry and great placement opportunities, the department stands tall and proud. Our students are not only academically sound and disciplined but they also organize various events. Welcome to the exciting world of Computer Science Engineering (CSE), a field that drives innovation, shapes the digital age, and empowers the technology-driven society we live in. CSE professionals are the architects of the digital realm, designing, developing, and optimizing the software and systems that power our world betterment of the society.

About the Programme

The Linux Operating System is a type of operating system that is similar to Unix, and it is built upon the Linux Kernel. The Linux Kernel is like the brain of the operating system because it manages how the computer interacts with its hardware and resources. It makes sure everything works smoothly and efficiently. But the Linux Kernel alone is not enough to make a complete operating system. To create a full and functional system, the Linux Kernel is combined with a collection of software packages and utilities, which are together called Linux distributions.

Objectives of the Programme

- Why are Linux skills essential for network security monitoring and investigation?
- How do you use the Linux shell to manipulate text files?
- How do client-server networks function?
- How does a Linux administrator locate and manipulate security log files?
- How do you manage the Linux file system and permissions?
- What are the basic components of the Linux GUI?
- What tools can you use to detect malware on a Linux host?

PROGRAM REPORT

Name of the Event: A ten days Certification course on “**LINUX OPERATING SYSTEM**”

Date: 28-11-2018 to 08-12-2018

Resource Person: K. Kiran Kumar, Associate .Professor

Mail id: jennyjony77@gmail.com

Contact number: - 9494763240

Name of the coordinator: Mr.P. Veeresh Kumar, Associate Professor

Department of computer science & Engineering

Number of students attended: 35

VENUE: Lab, PRIYADARSHINI INSTITUTE OF TECHNOLOGY AND MANAGEMENT

PRIYADARSHINI INSTITUTE OF TECHNOLOGY AND MANAGEMENT, Pulladigunta, organized certificate program on “**LINUX OPERATING SYSTEM**” for Btech students by the resource person K. Kiran Kumar, Associate Professor. The Linux Operating System is a type of operating system that is similar to UNIX, and it is built upon the Linux Kernel. The Linux Kernel is like the brain of the operating system because it manages how the computer interacts with its hardware and resources. It makes sure everything works smoothly and efficiently. But the Linux Kernel alone is not enough to make a complete operating system. To create a full and functional system, the Linux Kernel is combined with a collection of software packages and utilities, which are together called Linux distributions. Totally 35 students were participated in this training program and their completion of the program they were able to understand the following objectives and learning outcomes.

Course Outcomes

To evidence success in this course, the students will be able to

- Implement and administer a Linux Server
- Install and administer server services
- Manage Users and Groups
- Setup and manage policies
- Implement File Services
- Secure a Linux Server
- Understand Virtualization
- Students will be able to understand the basic commands of linux operating system and can write shell scripts
- Students will be able to create file systems and directories and operate them
- Students will be able to create processes background and fore ground etc.by fork() system calls
- Students will be create shared memory segments, pipes ,message queues and can exercise interprocess communication

Course objectives:

Upon completion of this chapter, you will be able to answer the following questions:

- Why are Linux skills essential for network security monitoring and investigation?
- How do you use the Linux shell to manipulate text files?
- How do client-server networks function?
- How does a Linux administrator locate and manipulate security log files?
- How do you manage the Linux file system and permissions?
- What are the basic components of the Linux GUI?
- What tools can you use to detect malware on a Linux host?
- To understand and make effective use of linux utilities and shell scripting language to solve problems
- To implement in C some standard Linux utilities like mv,cp, ls etc...
- To develop the skills the necessary for systems programming including file system programming, process and signal management and interprocess communication.
- To develop the basic skills required to write network programs using sockets

The course is very useful to the students and their feedback is positive. The management and Dr.D.V.V.S.Phani Kumar Garu, principal of **PRIYADARSHINI INSTITUTE OF TECHNOLOGY AND MANAGEMENT** thanked the Resource Person and participants for making the program successful.

About the Institute

Established in 2008, Priyadarshini Institute of Technology and Management (PITM, Guntur) is a premier Institute located in Andhra Pradesh. Institute offers Degree and Diploma courses including 7 UG and 5 PG courses. These programs are offered in Full Time mode. Priyadarshini Institute of Technology and Management (PITM, Guntur) is a premier institute for B.Tech, M.Tech, MBA courses. Candidate can pursue in multiple range of courses like B.Tech, M.Tech, MBA with the stream of Engineering, Business & Management Studies.

The Mission of Priyadarshini is to develop high quality technical education and personnel with a sound footing on basic engineering principles, technical and managerial skills, innovative research capabilities, and exemplary professional conduct to lead and to use technology for the progress of mankind, adapting themselves to changing technological environment with the highest ethical values.

About the Department

MBA:

A master of business administration (MBA) is a graduate degree that provides theoretical and practical training for business or investment management. An MBA is designed to help graduates gain a better understanding of general business management functions.

Many schools now offer specialty programs, like sports management, the entertainment business, or healthcare management. Executive MBA programs are available for experienced professionals who cannot commit to a full-time schedule. MBA programs may be full-time, part-time, online, or international, and each program usually has a varying degree of requirements for acceptance

About the Programme

Human resource development in the organization context is a process by which the employees of an organization are helped, in a continuous and planned way to:

- Acquire or sharpen capabilities required to perform various functions associated with their present or expected future roles;
- Develop their general capabilities as individuals and discover and exploit their own inner potentials for their own and/or organizational development purposes; and
- Develop an organizational culture in which supervisor-subordinate relationships, teamwork and collaboration among sub-units are strong and contribute to the professional well being, motivation and pride of employees.

Objectives of the Programme

- Why are Linux skills essential for network security monitoring and investigation?
- How do you use the Linux shell to manipulate text files?
- How do client-server networks function?
- How does a Linux administrator locate and manipulate security log files?
- How do you manage the Linux file system and permissions?
- What are the basic components of the Linux GUI?
- What tools can you use to detect malware on a Linux host?

Topics to be covered

- Concept of HRD
- HRD in selected industrial organizations
- Techniques of HRD
- HRD Strategies
- METHODS
- HRD programmes
- HRD interventions
- Barriers to mentoring
- Employee counseling for HRD
- Career planning
- Future of HRD Ethics
- Applications of HRD

PROGRAM REPORT

Name of the Event: A 10-days certificate program on “human resource development”.

Date : 03-08-2018 and 17-08-2018.

RESOURCE PERSON: Dr. KONIKI SRINIVAS

Designation : Professor

Department : MBA

Email ID : srinivask2417@gmail.com

Contact number: 9290458123

Name of the co-ordinator: Mr.RAYAPUDI SUDHAKAR Assistant Professor, dept of MBA

No of Students: 179

Venue: Seminar Hall, Priyadarshini institute of technology and management.

PRIYADHARSINI INSTITUTE OF TECHNOLOGY AND MANAGEMENT, Guntur.
Organized certificate program on “HUMAN RESOURCE DEVELOPMENT” for MBA students by the resource person: **Dr. KONIKI SRINIVAS.** Human resource development in the organization context is a process by which the employees of an organization are helped, in a continuous and planned way to:

- Acquire or sharpen capabilities required to perform various functions associated with their present or expected future roles;
- Develop their general capabilities as individuals and discover and exploit their own inner potentials for their own and/or organizational development purposes; and
- Develop an organizational culture in which supervisor-subordinate relationships, teamwork and collaboration among sub-units are strong and contribute to the professional well being, motivation and pride of employees.
- Human Resource Development can be formal such as in classroom training, a college course, or an organizational planned change effort. Or, Human Resource Development can be informal as in employee coaching by experts in the industry or by a manager. Healthy organizations believe in Human Resource Development and cover all of these bases.

Course Objective:

- To understand the evolution and functions of HRD
- To identify the content, process and the outcomes of HRD applications
- To evaluate and understand diversity issues and their impact on organizations

Learning outcomes:

HRD outcomes provide the ground rules to build an organization excelling in people, processes, products and profits.

1. Training makes people more competent. They develop new skills, knowledge and attitudes.
2. There is greater clarity of norms and standards. People become better aware of the skills required for job performance.
3. People become more committed to their jobs because there comes greater objectivity in the administration of reward
4. People develop greater trust and respect for each other. They become more open in the behavior and the new outcome like values are generated.
5. There is great collaboration and team work which produces synergy effect.
6. There is greater readiness on the part of employees to accept change. They find themselves better equipped with problem solving capabilities.
7. Lot of useful and objective data on employees are generated which facilitate human resource planning.
8. Participation develops in works a sense of achievement and pride.
9. HRD helps inducing multi skills to the employees
