

2.3.1 Student centric methods, such as experiential learning, participative learning and problem-solving methodologies are used for enhancing learning experiences using ICT tools:

A. Experiential Learning Methodologies:

1. By way of application of theoretical information and knowledge, students develop required skills in laboratories for furtherance of technological wisdom. They execute experiment taking support of efficient faculty and lab technicians.

2. Industrial visits provide students with the first-hand information about the industry. The students are assisted in making use of the field experiences for their brighter visualization, development, and placements. All this bridges the gap between academic institutions and industry.

3. 'Industrial Internships' organized during vacations provide students with an opportunity to understand industrial environment in advance of their real-time entry. These internships help students in the analysis of their personal abilities, strengths and thereby they will get a realistic picture of what they should do and be during their learning.

4. Project exhibitions and hobby projects enrich students' work-experience. Creativity and innovation emerge out of students' thoughts, which develop their confidence.

B. Participative Learning Methodologies:

1. Departmental activities like workshops, seminars, conferences, guest lecturers etc..., related to engineering and technology, nature professional attitude among students at an early stage of learning. Student fraternity and professional associations take a lead in this regard.

2. The National Level Technical event- FUSION-2K-XX is an every-year event in the college. Competitions like paper and poster presentations, project exhibitions, circuit-trix, technical quiz, JAM etc..., are conducted for the development of competitive spirit among students.

3. Achievement motivation is a priority in the college and students are encouraged to register for and learn from NPTEL course in their domains.

C. Problem-Solving Methodologies:

1. The problem-solving methodology includes definition of the problem in hand and making of a proper plan to resolve it. Our faculty-members snide students to apply problem-solving approach in their academic, technical, and vocational domains. Case studies, assignments and tutorials are made use of in making students develop their problem-solving expertise.

2. Participatory observation is encouraged and students are assisted in acquisition of dependable knowledge, skills, and professional outlook in their learning.

PRIYADARSHINI INSTITUTE OF TECHNOLOGY AND MANAGEMENT

5th mile, PULLADIGUNTA, Kornepadu (V), Vatticherukuru (M), GUNTUR-522017 (A.P.)

Approved by AICTE, Affiliated to JNTUK

www.pitmgnt.ac.in

D. Additional Students-Centric Approaches for Learning:

Co-operative Learning is an instructional method, in which students work together to accomplish shared goals. Co-operative Learning is habituated through the following:

- Application of relevant modern technology.
- IIT virtual Labs for practical knowledge.
- Brainstorming and generation of innovative ideas for problems-solving approach.

Facilities for Continuity in Self-Learning

1. Digital Library: The digital library is a one-spot solution to students for self-learning and comprehensive acquisition of technological knowledge.
2. Central Library: The central Library is an abode of unlimited knowledge and inspiration to students. The library stands in support of students in providing them with prompt resource for reading and learning.
3. The institution has an NPTEL chapter through which students are encouraged to register for and acquire new course, which pave the way towards self-excellence.
