PROGRAM REPORT

Date: 17/08/2021

Name of the Program: A ONE WEEK FDP on DEVOPS

Organized by: Department of Computer Science & Engineering

Dates: 09/08/2021 to 14/08/2021

Resource Person: Dr.K. Bulli Babu
Professor
GEC College, Guntur
Bullibabu02@gmail.com

Objective:

DevOps' main goal is to develop a sustainable infrastructure for specific applications and ensure high scalability. After all, scalable apps are highly reliable, automated, and integral in the modern-day software development process. establish an environment where releasing more reliable applications faster and more frequently can occur.

PRINCIPAL
PRIYADARSHINI INSTITUTE OF
TECHNOLOGY & MANAGEMENT
5th Mile, Pulladigunta,
KORNEPADU (Vil), Vatticherukuru (M)
GUNTUR - 522 017

About the FDP:

DevOps entails a set of integrated activities or practices employed in automation and interlink software development processes with IT developers with the aim of building, testing, and releasing deliverables quickly and reliably. Constantly, DevOps has resulted in the use of infinite loops by the developers or practitioners in showing the relationship between development lifecycle phases. Even though the various activities or steps in a DevOps make a loop and flow sequentially, the iteration indicates that the flow must be constantly collaborative and repetitive to improve the entire lifecycle. If well explored by DevOps, various software automation trends could be ready to handle the industry's latest software and technology.

Program Outcome:

Identify components of Devops environment.→ Describe Software development models and→ architectures of DevOps. Apply different project management, integration,→ and testing and code deployment tool. Investigate different DevOps Software development→ models. Assess various DevOps practices.→ Collaborate and adopt DevOps in real-time projects.

Name of the Program: A Five day FDP on COMPOSITE MATERIALS

Organized by: Department of Mechanical Engineering

Dates: 08/11/2021 to 13/11/2021

Resource Person: K.D.N.Malleswara rao
Asso Professor
Priyadarshini institute of Technology and Management,Guntur
Malleswararaok57@gmail.com

Objective:

A composite material is a combination of two materials with different physical and chemical properties. When they are combined they create a material which is specialized to do a certain job, for instance to become stronger, lighter or resistant to electricity. They can also improve strength and stiffness. Composites have less fracture toughness than metals but more than most polymers. Their high dimensional stability allows them to maintain their shape, whether hot or cold, wet or dry. This makes them a popular material for outdoor structures like wind turbine blades.

GUNTUR - 522 017

About the FDP

The objective of the FDP is to inculcate the knowledge on the development of advanced FRP materials using different types of fibers and polymers for various applications. Every industry is now vying with each other to make the best use of composites. One can now notice the application of composites in many disciplines such as Civil, Mechanical, aerospace, automotive, marine, medical Electronics & telecommunications, sports goods to space vehicles. Hence based on the above concept note, the participant should be able to understand and apply state of the art knowledge of different composite materials in Structural Engineering applications.

Program Outcome:

- Versatility and Flexibility.
- Resistance to Weather and Corrosion.
- Excellent Weight-to-Strength Ratio.
- Durable and Long-lasting.
- Low Cost.
- Thermal Insulation.
- Non-Conductive to Electricity.
- Better Appearance.

PROGRAM REPORT

Name of the Program: A Five day FDP on EMBEDDED SYSTEMS

Organized by: Department of Electronics and Communication Engineering

Dates: 07/03/2022 to 11/03/2022

Resource Person: K.Kondaiah
Asso Professor
Priyadarshini institute of Technology and Management, Guntur
Kondaiahk89@gmail.com

Objective:

On completion of this course, successful participants will be able to:

- Perform effectively as entry level Embedded Systems professionals.
- Develop and maintain applications written using Embedded C.
- Independently design and develop a hardware platform encompassing a microcontroller and peripherals.
- Understand the Number system, Boolean algebra, Logic Gates, Adders, Flip-Flops, Counters, Registers, Multiplexers and Schmitt triggers.
- Understand Digital circuits are electric circuits based on a number of discrete voltage levels.
- Understands basics of Electronic Components like Resistor, Capacitor, Diode, Transistor and IC's etc

GUNTUR - 522 017

About the FDP

The future of embedded systems is bright with several key predictions shaping the industry. One of the primary predictions is an increased demand for low-power, high-performance embedded systems. As devices become more connected and intelligent, they will require more processing power while consuming less energy. An embedded system is a microprocessor-based computer hardware system with software that is designed to perform a dedicated function, either as an independent system or as a part of a large system.

Program Outcome:

- 1) Explain the real time embedded system and its components.
- 2) Understand basic components and building blocks of Internet of Things.
- 3) Apply skills to conduct interfacing of embedded boards with components, actuators and sensors.

Report of Training Session for Non Teaching faculty on "Ms Office"

Users can create MS Word reports in Creatio and configure them using the Creatio MS Word Report Designer plug-in.

Learn more about creating and setting up MS Word reports in the "Set up MS Word reports" article.

Use macros to set up extra data output options for an MS Word report. You can use basic macros and create custom macros.

Basic macros

The general procedure of creating an MS Word report using basic macros is as follows:

1. Install the MS Word Report Designer plug-in. This is a one-time procedure. Learn more in the "Installing Creatio plug-in for MS Word" article.
2. Add a new report record in the section.
3. Set up the report display parameters
4. Install the MS Word Report Designer plug-in. This is a one-time procedure. Learn more in the "Installing Creatio plug-in for MS Word" article.
5. Add a new report record in the section.
6. Set up the report display parameters
7. Set up the report template layout in the Creatio MS Word Report Designer plug-in and upload the template to Creatio.
8. Install the MS Excel Report Designer plug-in. This is a one-time procedure. Learn more in the "Installing Creatio plug-in for MS Excel" article.
9. Add a new report record in the section.
10. Set up the report display parameters
